To Whom it May Concern

RE: United Fire & Water Damage Restoration

Gentlemen:

My wife and I have been asked to comment on our experience with the above referenced firm: and we are happy to do so.

After Hurricane Gustov, we were left with severe roof damage. We received several estimates from people with no address on their business card or no business sign on their trucks. Mr. Hussey's company was suggested. We found that he was local, licensed and already doing work for several large organizations in the Baton Rouge area.

After a visit from our adjuster, we knew the ball park price of repairs that would be allowed by the insurance company. UFW worked within that framework to get our residence repaired. While we had to come out of our pocket for the deductible, we still were much better off than we would have been with the other estimates we received. We believe we received quality workmanship at a reasonable price. Therefore we would not hesitate to recommend this company to our friends (and as a matter of fact—we did).

Sincerely,

Bill & Sandy Williams
